# TRUST AI

Higher Education as a Catalyst for the Trustworthy and Sustainable use of AI

Start date: 01.10.2024
End date: 30.09.2026

Our goal

The goal of TrustAI project is to create prerequisites for higher education institutions to act as a catalyst for the trustworthy and sustainable use of AI by designing a curriculum for the humanitarian specialties and developing training resources and activities in AI designed in collaboration with the business to ensure that the future generation of graduated humanitarians and their HE lecturers are well equipped when it comes to the challenges posed by AI technologies in building AI skills based on ethics, trustworthiness, and sustainability.

Target groups

- Higher education students in humanitarian fields
- Higher education lecturers in humanitarian fields

Expected results

- **TrustAI curriculum for HE students in humanitarian fields** focusing on AI concepts and terminology, various AI tools and their application for humanities and pointing the attention to the ethical and environmental implications of AI-powered systems.
- **TrustAI training incubator for HE lecturers in humanitarian fields** aimed to boost the capacity of HE lecturers in humanitarian fields with the necessary knowledge, skills and competences to effectively apply AI tools in their work.
- **Sustainability and transferability roadmap** aiming to encourage the uptake of TrustAI results and their transfer to other educational fields.
